

LOCAL AND N. Y. FINANCIAL NEWS

TRADING ON LOCAL EXCHANGE IS LIGHT

With the majority of the orders upon the floor confined to odd lots of stock, trading on the Washington Stock Exchange today was very light and narrow, and there was a tendency to lower price levels, particularly those which prevailed for street railway bonds.

There was a good demand for small lots of Capital Traction stock at 16 1/2, and eleven shares were disposed of at that figure. The other sales recorded included twenty-five shares of Washington Railway and Electric preferred at 9 1/2 to \$2, and a \$500 Capital Traction 5 percent bond at 107.

Allan E. Walker, secretary of the Washington Stock Exchange, accompanied by Mrs. Walker, will leave Washington tomorrow morning on a vacation trip. He will be absent until September 1. Mr. Walker will motor first to Atlantic City, and go later to Polaris Springs, Me.

John L. Edwards, a member of the exchange, will go by automobile tomorrow to Monterey, Cal., where he will stay until September 1.

FOREIGN LIQUIDATION HURTS WALL STREET

NEW YORK, July 30.—After a display of resistance which was soon eliminated, the stock market this morning under heavy foreign liquidation broke sharply and losses of several points became general throughout the list for all active issues. In London there was, as on yesterday, practically no trading in American issues, and the quotations made were merely nominal, with declines ranging from 1 to 4 points.

Aside from the fact that the war news this morning was less encouraging than was the case last night, a depressing influence was exerted by the announcement of additional failures among London brokerage houses.

Shortly after the opening there was little visible support for the international stocks, the large interests which have maintained the straggling market apparently being content to keep the decline orderly and preclude the precipitation of a panic. The rapid advance in the price of wheat continued to be a medium through which the market was depressed, declining 6 1/2 points to 100, but later rallying sharply to 105, and then settling at 104 1/2.

In the international market, the price of wheat continued to be a medium through which the market was depressed, declining 6 1/2 points to 100, but later rallying sharply to 105, and then settling at 104 1/2.
